

## **American History and Our State: Arizona**

Our high-interest, inspiring, narrative approach to history brings to life famous people; major events; changes in ways of travel, communication, and thinking; and the Christian principles that made America great. The outstanding visual features of the text books we use from Abeka Press and Splash Publications make the student's first formal study of Arizona and United States history positive and enjoyable. This 2 year course is taught in time-order with the history of the southwest and the history of America running side-by-side. Each class develops a time line to highlight major events and reads literature to enrich the understanding of important historical characters or events. Important geographical facts and historical documents that should be given special attention throughout the year are highlighted and placed in the classroom for easy reference. It's history from a Christian world view. <http://www.Abeka.com> is the website if you would like more information.
