

Elementary Spanish

Spanish is part of the academic week for all GCS students. All-day kindergarten students begin a hands-on, interactive curriculum that teaches the students communication skills in the language. Puppets, songs, role-playing, and props are important teaching tools in the program. GCS students learn to skillfully comprehend the spoken word. They become comfortable speaking about themselves and their surroundings in Spanish. Once there is a strong base in comprehension and speaking, the students begin to express themselves in writing.
